Motors and Drives Incentives for Business Program

Commercial and industrial customers of FirstEnergy's utility operating companies in Pennsylvania – Met-Ed, Penelec and Penn Power – can now take advantage of the *Motors and Drives Incentives for Business* program, which offers incentives to encourage the installation of high-efficiency motors and variable speed drives (VSDs). Costs to implement the program are recovered from FirstEnergy's commercial and industrial customers in Pennsylvania in accordance with Act 129 of 2008.

NEMA Premium® rated, Open Drip-Proof (ODP) and Totally Enclosed Fan-Cooled (TEFC) motors up to 200 HP are eligible for a per-motor incentive based on motor size and speed (see reverse for minimum efficiency requirements). Newly installed VSDs (where no drive previously existed) are eligible for an incentive of \$30 per horsepower controlled (see application form for details).

Customers may review program information and download applications to receive incentives for qualifying units as described in the program's application form.

To qualify, equipment must have been purchased on or after October 28, 2009. Federal facilities can take advantage of a different program.

For application forms and more information, please visit www.energysavePA.com.

Program representatives can be reached via email at energysavePA@SAIC.com.

Also Available!

FirstEnergy is offering additional programs for commercial and industrial customers. Visit www.energysavePA.com for details on Lighting, HVAC and other business programs.
